

Empowering departments

Three ways to harness departmental expertise while maintaining controls

We give you the tools to make

3 major impacts

1

Accelerate developers and empower business users to develop solutions faster with safeguards in place.

Build solutions with less effort using generative copilot and AI. Go from idea to solution in no time.

2

3

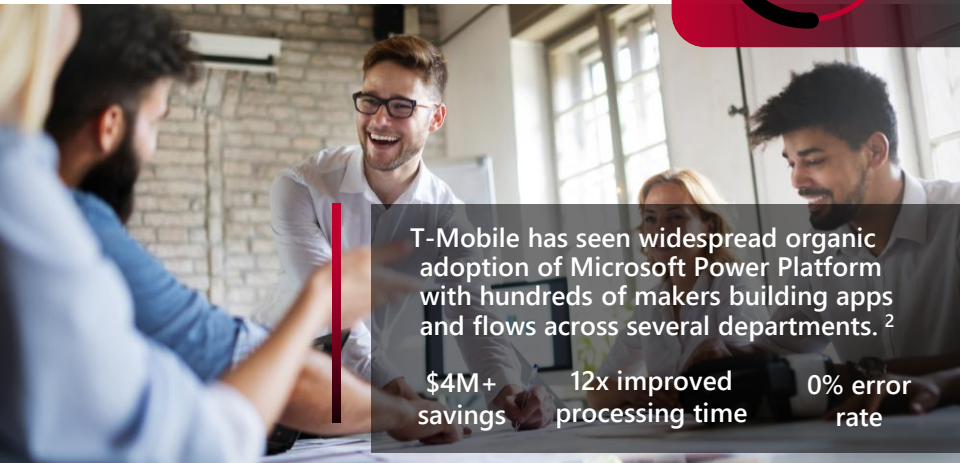

Keep IT in full control and reduce shadow IT risk, with centralized administration tools and governance.

Maintain controls and combat shadow IT

More than 80%

of users and potential users of low-code platforms report that they would be more willing to work for a company that invests in their technical upskilling.¹

80%

T-Mobile has seen widespread organic adoption of Microsoft Power Platform with hundreds of makers building apps and flows across several departments.²

\$4M+ savings

12x improved processing time

0% error rate
