WatchGuard Firebox
One Platform, Total Security

The WatchGuard Firebox is a comprehensive advanced network security appliance that puts IT security professionals back in charge of their networks with widely deployable, enterprise-grade security and threat visibility tools suitable for any organization, regardless of budget or complexity. Every year, the average Firebox blocks over 1,300 malware attacks and 250 network intrusions for WatchGuard customers.

WatchGuard offers an award-winning portfolio of network security services, from intrusion prevention service, gateway antivirus, application control, spam blocking, and web filtering to more advanced services for protecting against advanced malware, ransomware, and data theft.

When managed in the WatchGuard Cloud, Firebox management and network configuration are simple to set up and configure for multiple clients and different networks. Your team can spend less time on processes and more time on profitability, while still delivering the level of security your customers expect.

Network Automation to the Core

Automation is at the heart of WatchGuard's Unified Security Platform, speeding up processes, killing threats, and empowering IT teams to do more in less time. WatchGuard Firebox is designed with automation to the core, freeing up valuable IT time for other tasks.

SSL Inspection & Protection

Today, over 80% of your customers' traffic occurs over HTTPS, creating a massive blind spot. At WatchGuard, we don't view HTTPS content inspection as a "nice-to-have" feature – it's a security essential standard in every WatchGuard Firebox. What's more, WatchGuard Firebox fully inspects TLS 1.3 traffic, and was one of the first firewall platforms to do so.

Supports the Latest VPN Technology

Virtual Private Networks (VPNs) are used to provide a secure tunnel from remote locations back to a central office. WatchGuard Firebox offers branch office VPNs for site-to-site connections to remote/ mobile offices with IPSec/IKEv2, and SSL VPN.

Get a Cloud's-Eye View of Your Network

WatchGuard Cloud makes it possible to get a high-level, aggregated big picture view of network activity that pinpoints top threats and trends, active policies and traffic patterns, and correlated views of top users and applications. The platform displays 100+ dashboards and reports that allow you to quickly see overall trends and anomalies then drill down into detailed information on each.

Policy Management, Simplified

WatchGuard Cloud makes policy creation and management a breeze with one-click security service implementations and pre-configured policies to deploy content scanning, network inspection, content filtering, and other services at scale. WatchGuard Cloud policy templates can apply configurations to appliances across multiple locations, so you can scale deployments with group and company policies.

Built-In SD-WAN

WatchGuard delivers a range of appliances that are perfectly sized for the branch office, retail outlet, or healthcare clinic, and can deliver SD-WAN along with stellar security. SD-WAN functionality is a standard feature on each of our award-winning firewalls, giving you the ability to easily protect your network while optimizing your connectivity costs.

A Firebox For Every Situation

Easy to Deploy

Remotely deploy and configure multiple Firebox appliances across a distributed enterprise with minimal on-site assistance using a Cloud-based deployment and configuration tool.

Easy to Manage

Manage one Firebox appliance or hundreds from a single, easy-to-use console, maximizing efficiency and streamlining network administration, while applying configuration changes in real time or as a scheduled task.

APT Blocker   ThreatSync   DNSWatch   IntelligentAV
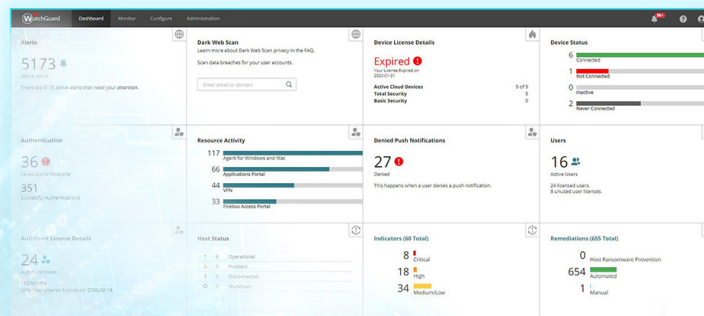

WatchGuard offers the most comprehensive portfolio of security services in the industry, from traditional intrusion prevention, gateway antivirus, application control, spam prevention, and URL filtering, to more advanced services for protecting against evolving malware, ransomware, and data breaches. Each security service is delivered as an integrated solution within an easy-to-manage and cost-effective Firebox appliance.

Technology Partner Ecosystem: Firebox Can Do It All

The Firebox sits at the core of your network, protecting your business from the most advanced threats through its sophisticated layers of security that are delivered in a way that is simple for any organization to consume. Now take the Firebox and integrate it across your broader IT ecosystem, protecting more applications and more users, while simplifying your IT management.

WatchGuard integrates with leading Remote Monitoring Management (RMM) platforms to provide syslog reporting, email alerts, and SNMP traps and queries for Firebox appliances and security services.

> With WatchGuard, we buy the 'Total Security' package and it's done. We don't need to worry about anything else. With some of the competitors, you're buying six or seven different lines on the bill of materials just to get the same thing you get on one line with WatchGuard.

Network Security Insights

Brought to you by WatchGuard Threat Lab. WatchGuard's Threat Lab (previously the LiveSecurity Team) is a group of threat researchers committed to discovering and studying the latest malware and Internet attacks. The Threat Lab team uses data from WatchGuard's Firebox Feed, internal and partner threat intelligence, and a research honeynet, to provide analysis and practical security advice about the top threats on the Internet.

WATCHGUARD'S UNIFIED SECURITY PLATFORM ARCHITECTURE

Regardless of existing security deployments, SMBs and distributed enterprises continue to fall victim to advanced threats that have serious impact on business operations and continuity. No single security control, or subset of controls, is sufficient. WatchGuard's Unified Security Platform® architecture is the answer. It is a single platform that offers the comprehensive security, clarity and control, shared knowledge, operational alignment and automation security administrators need to deliver effective protection. In addition to critical network security solutions, our unified platform approach offers powerful, Cloud-managed endpoint, multi-factor authentication and Wi-Fi security services as well.

About WatchGuard

WatchGuard® Technologies, Inc. is a global leader in unified cybersecurity. Our Unified Security Platform® approach is uniquely designed for managed service providers to deliver world-class security that increases their business scale and velocity while also improving operational efficiency. Trusted by more than 17,000 security resellers and service providers to protect more than 250,000 customers, the company's award-winning products and services span network security and intelligence, advanced endpoint protection, multi-factor authentication, and secure Wi-Fi. Together, they offer five critical elements of a security platform: comprehensive security, shared knowledge, clarity & control, operational alignment, and automation. The company is headquartered in Seattle, Washington, with offices throughout North America, Europe, Asia Pacific, and Latin America. To learn more, visit **WatchGuard.com**.
